

Hi Professor,

I'm happy to take this course with you this semester! 😊

My Chinese name is Yuhang Yu, and my English name is Yulia. I major in Business Analysis, and my student ID is 1308147.

I'm an easy-going person who enjoys campus life. I actively participate in student organizations and have experience as a student assistant. In my free time, I enjoy listening to K-pop and I've traveled to Korea multiple times for concerts. I also love exploring new places and trying different kinds of food.

I'm really looking forward to learning Python in this course. This class is very important to me, and I really hope to do well. To be honest, I don't have much confidence in my abilities when it comes to computer-related courses, but I know how essential this is for my studies. I'll do my best and work hard to improve step by step throughout the semester!
